

Current and future tracking and vertexing detectors 2023

Tuesday 7 November 2023 - Wednesday 8 November 2023

People's Palace

Scientific Programme

An international workshop on tracking and vertex technologies. Talks will include current performance and future upgrades for running experiments, talks about tracking at future colliders, along with talks from test beam and CMOS development groups. Day 1 is generally focused on existing detector performance with Day 2 on future detector upgrades and research. Please see the timetable for full details.
